## Summary

---

As a first-year IT student at ADA University, I am highly enthusiastic about pursuing a role as a Web Developer. My passion for technology has driven me to master foundational skills in HTML and CSS, and I am currently advancing my expertise in JavaScript. Additionally, I possess a solid understanding of Python, which has broadened my programming capabilities. I successfully led a university project as part of my coursework, which not only enhanced my technical knowledge in design and programming but also helped me develop valuable soft skills such as teamwork, communication, and time management. I am eager to apply my skills to real-world projects and continuously grow as a developer while contributing to innovative solutions in the tech industry.

## Experience

---

### Team Project by ADA University
